

**Product name: Krux Heko**

**Product code: KRXD001**

Here's Heko, the unity of endurance, aesthetics and ease of setup. In it, all the advantages come together to create a magnificent stronghold for your PC.

### **Beauty and grit**

Heko is a unit of a universal build. It has a hefty capacity, it's stable and just looks great. You can use its inside to plan the whole panorama of your personal empire for everyone to admire. The side panel is mounted on hinges so that you can look inside without the hassle of disassembly.

### **Anti-dust filters**

Once you build an empire, you have to keep it clean. Heko is reliably guarded by three filters that provide the necessary protection from dust. The front filter is mounted on latches between the front glass panel and the fans. The upper one, hard carrying the falling dust, is mounted on magnets so that you can take it off and clean it easily. The bottom filter has a dedicated slot that keeps it from sliding out due to vibrations.

### **Personal army HQ**

The thing that makes Krux Heko stand out from the crowd of other cases is the placing of the motherboard slot. It leaves a lot of space for the cooling system and other components. And, if you're planning to arm your unit with a mighty GPU, you'll need all the space available.

For the same reason, you can fit Heko with up to eight 120 mm fans. And you'll do it without forcing it all in.

### **Mighty cooling on the go**

It would be a shame to let all that space go to waste, so Krux Heko comes out of the box with four ARGB 120 mm fans – three in the front and one in the back. Not only will they provide low temperatures inside (at least until you try to launch three AAA titles at once), but also light up your whole case.

### **Adapt the build**

Here's one more way we outshine our competitors. Heko has movable bolted PCIe brackets that you can place any way you want and need. Customization to the fullest.

### **Krux Heko - main features:**

- Glass, magnet-mounted front
- Front anti-fust filter with a snap fastener
- Hinged side panel
- Additional space over motherboard allowing for installation of a cooling system on top
- Removable PCIe pegs

### **Krux Heko – technical specifications:**

- **Product code:** KRXD001
- **EAN:** 5903018667508
- **Color:** Black
- **Dimensions (H×W×L):** 490×210×396 mm
- **Motherboard form factor:** ATX/microATX/miniITX
- **Compatible HDD:** max 3× 2,5" / max 2× 3,5"
- **Graphics card clearance (GPU):** 340 mm
- **CPU cooler clearance (CPU):** 165 mm
- **Max PSU length:** 205 mm
- **Cooling system:**
  - Number of fans (max): 8 (5× 120/140 mm + 3× 120 mm)
  - Number of fans (installed): 4× 120 mm ARGB
- **Dust filters:**
  - Front
  - Top
  - Under PSU
- **Tempered glass panels:**
  - Front
  - Side
- **Lighting:** ARGB
- **Warranty:** 24 months

### **Krux Heko – logistics data:**

- Retail box dimensions: 570×292×420 mm
- Weight (net): 6.138 kg
- Weight (gross): 7.380 kg

### **Set includes:**

- 1× Krux Heko case
- 4× 120 mm ARGB fans
- 1× Installation accessories
- 1× User and safety manual
