

Product name: Krux Arm 100

Product code: KRXH005

Like a rogue under the veil of night, Krux Arm 100 sneaks onto the scene to take on all the tasks that require precision and grace. Tired of all the springs sticking out? Now you can have a slim stand that's just as impressive as its bigger siblings when it comes to mobility and utility.

Slick and deadly

Does Hitman carry a whole big construction frame with him? Absolutely not – he needs some light equipment fit for special tasks. Krux Arm 100 would rank high on the shopping list of every professional who relies on maneuverable and slick tools. A thin arm beam and a narrow base with a clamp will fit right on every computer station.

All-purpose

The size is just the beginning of Krux Arm 100's versatility. Aside from the stand, in the box, you'll find some gadgets and accessories that will make it easier for you to mount all kinds of audio or small video equipment. The preinstalled 3/8" thread can be mounted with either an 1/4" or a 5/8" adapter (different calibers for different jobs – we got you covered).

All kept in order

You can pile things up on your bed or in your backpack, but the desk must be all clean and tidy to always be ready for the next mission. For one, Krux Arm 100 is supplied with hook-and-loop straps to tie the connecting cable to the arm. You'll also find a tiny magnet that you can stick to metal elements or tack to your desk to keep a hex wrench handy for instant regulation and tightening.

Up and wide

Krux Arm 100 is so universal that we recently got a call from Johnny asking if we also make it in silver. This stand has a 790 mm range in all directions. On the one hand, it will work great with small and tight workspaces. On the other hand – it will also be useful on bigger workstations, where you want to keep a minimalistic approach and leave a lot of free space.

Fits and sits

Once Krux Arm 100 is in its right place, you can fix it using a base clamp with rubber surfaces. They protect the surface of the desk from scratching and stabilize the arm even if you move it around a lot. The mounting bolt also has a distance gasket to make small adjustments easier. And so, the fun begins.

Krux Arm 100 – main features:

- Sturdy aluminum construction
- Universal thread adapters
- Assembly key with a magnetic holder
- Full range of horizontal rotation
- Arm clamp with a soft covering to protect the desktop

Krux Arm 100 – technical specifications:
