

Product name: Krux Epic 1000S

Product code: KRXC007

If you told someone one thousand years ago that speaking to a black capsule in front of a quartz abacus could make you famous worldwide, best case scenario they'd just laugh at you. Fortunately, the times have changed, and Krux Epic 1000S is your mythic drop. It's a small microphone for your desk, but a big step in becoming a legend.

Control the sound on the go

Whether you're a content creator, a streamer, a radio speaker or just a person who's on the voice chat all day, you need a compact mic that you can use easily without needing any additional software. The bottom of the microphone's casing is a GAIN knob for input control. On its top, you'll find a touch-activated switch that allows you to mute it instantly.

No-hassle monitoring

No time to set up the audio? We know the drill, Gold rank won't reach itself this season, there's a recording backlog, and your crew is calling you to the group chat. Of course, you can choose an audio interface, a metric ton of cables and four separate apps to control every step of the recording process. Or you can just plug in your headphones or earphones of choice to the minijack 3.5 mm output on Epic 1000S and have it work, just like that.

Desktop bling generator

Convenience & ease is one thing, but what about the style? The Krux Epic 1000S microphone does not lack in this department. Within it, there's an RGB backlight shining with a thousand colorful suns. Once you set the mic on your desktop, plug it in and turn on the PC, everything around it becomes a lot prettier.

Small stand, big chill

Krux Epic 1000S comes with a small desktop stand. It allows you to set it up just in front of the keyboard or behind it, or anywhere near it. It's a comfortable solution that spares you the worries if you don't need your microphone on a mobile arm. It takes only a little space on your desk and doesn't wiggle around on its own.

Broadened compatibility

If all that is not enough, the Krux Epic 1000S can be plugged into a wide range of devices needing an external microphone. It's recognized by Windows, Linux and MacOS computers. You can also plug it into your PS4 or PS5 if you want to use it while gaming in front of the TV. What's more, it will also pair with Android devices if they have the OTG function and a USB-C port. Now tell me that's not epic.

Krux Epic 1000S – main features:

- GAIN knob for input control
- Mute function
- 3.5 mm minijack output
- RGB backlight
- USB-C adapter included
- Small size and secure desktop stand
