

Product code: KRXC003

Product name: Krux Clapz Wireless Black

Do you need a pair of headphones that will catch up with your free spirit? We introduce Krux Clapz Wireless Black. It's the end of sitting at the PC like on a leash, it's the end of wrapping the audio cable around your smartphone, it's the end of the awkwardness. Your story enters the wireless era – with no compromise.

Featherweight

You put on Krux Clapz Wireless Black and you wonder – is there anything on my head at all now? These headphones weigh only 175 g, so get ready for hours-long raids or binge-watching the series you're hyping currently – all that without a need for a chiropractor visit after.

A day of playback non-stop

It will be hours on end for sure – Krux Clapz Wireless Black headphones hold a charge that will endure even the longest music-infused walks. Used at 70% volume, they will last up to 24 hrs (yes, TWENTY FOUR HOURS). When you go and take a nap, put them on the charger and they'll be ready for the next marathon once you wake up.

Premium seats for your ears

Okay, you already know that Krux Clapz Wireless Black are light, but this is not the end of conveniences they provide. The earpads are covered with a breathable material that will prevent your ears from turning into steamed ham after half an hour of listening. Also, the material layers inside the earpad will protect your ears from touching the speaker's casing.

Broadly compatible

The leash-cord days are over, we're going wireless. Together with the Clapz you get a dongle that you can plug into your computer for an instant connection with the headphones. What if you got no free ports, or you want to pair them with a mobile device? Not a problem in the slightest, because Krux Clapz Wireless Black are compatible with devices provided with Bluetooth technology. Also, once you're tired of all the newly found freedom, you can always come back to a wired connection thanks to a USB-C cable.

A pilot? Who needs that?

Interface can be simple and easy to use not only in AAA titles. In Krux Clapz Wireless Black, the volume control and mute toggle are available through buttons on the casing of the headphones. No extra panels, no extra pilots, all within hand's reach.

Plug the mic in and speak

In case listening is not enough and you need to confirm your presence or answer a workshop question, Krux Clapz Wireless Black are supplied with an external microphone. Put it into its dedicated slot, choose a proper sound input on your device and bring the world to its knees, word after word.

Krux Clapz Wireless Black – main features:

- Ultra-light - the headphones weigh just 175 grams, so using them causes no fatigue even during long listening sessions. They are also easily adjusted to the head's shape in a few distinct ways.
- Long battery life – provided playback for up to 24 hours as long as the volume is set at 70%. Batteries take only two and a half hours to fully load.

- Three connection methods - aside from connecting via a USB 2.4 GHz dongle, Clapz Wireless Black can also be connected to devices equipped with Bluetooth (laptops, smartphones). A direct connection via a USB cable is also available.
- Easy control - the headphones are equipped with buttons that make playback control a breeze.
- Detachable microphone - the headphones come with an easy-to-use microphone for clear communication. When it's not in use, it can be easily detached from the headphones.
- Comfortable ear pads - for added comfort, ear pads are covered with a breathable material. They are filled with soft padding so that the headphones are as comfortable to wear as possible.
