

Product name: Krux Crave Pro Wireless

Product code: KRXC013

Are you living actively, switching between various devices that you like to use for games and other media? The versatile Krux Crave Pro Wireless headphones let you comfortably enjoy high-quality sound in all scenarios, connecting both wirelessly and using a USB cable.

Make it sound the way you like it

Take advantage of the predefined EQ settings. Standard provides strong bass, Soft bass dampens the low end, and Vocal boost makes the singing and dialogue stand out more. Press the appropriate button on the headphone chassis and choose your preferred mode – with no additional software needed.

Dongle, BT, or a good ol' cable?

It doesn't matter what device you're using, and whether you prefer the freedom of wireless pairing (2.4 GHz USB dongle and BT) or a classic USB cable connection, Krux Crave Pro Wireless – headphones will surely meet your expectations. They also provide broad compatibility with PC (Windows), Mac (macOS), smartphones & tablets (Android and iOS), and a selection of gaming consoles (PS4/PS5, Switch).

Play, talk – it's always ready!

Krux Crave Pro Wireless includes a special BT STANDBY MODE that lets you smoothly switch between computer and smartphone signals. Connect the headphones to your PC 2.4 GHz via USB dongle and pair them with your phone using Bluetooth technology. With an incoming call, the set will automatically switch from the PC signal to the paired phone.

Lag-free sound

When the action is tense, zero latency is key. If you want to instantly catch your enemy's footsteps or hear the explosion in a high-octane movie clearly, connect Krux Crave Pro Wireless headphones using the 2.4 GHz USB dongle or a USB cable.

Day-long work? They can do so much more!

If you like your gear always ready for use, the KRUX Crave Pro Wireless is on point for you. One full charge lasts 60 hours of wireless mode use on half the volume. Thanks to this, charging them once will last you days of listening.

The unmatched duo of drivers and an advanced mic

High-quality 50 mm drivers are great at conveying sound in various applications, be it gaming, voice chatting, listening to music & podcasts or watching movies. The people you talk with will appreciate the built-in cardioid mic, causing less background noise to leak through. The microphone is instantly muted when you fold it up.

Convenient controls

You no longer need to switch focus to change the audio settings using the keyboard, mouse, touch screen or gamepad. The roller and buttons built into Krux Crave Pro Wireless let you change the audio mode, adjust the volume, or receive calls.

Highest standard of comfort

A strong battery isn't the only thing that will encourage you to use Krux Crave Pro Wireless for hours. The hybrid earpads were created joining the outer PU leather and soft fabric layer with the inside made of memory foam. This not only makes them comfortable but also provides passive sound isolation.

Krux Crave Pro Wireless – main features:

- Adjust sound – Standard, Soft bass and Vocal boost are the three audio presets that can be used whenever a need for a different equalization comes.
- Three connection modes – use the USB cable, or connect wirelessly via 2.4 GHz USB dongle with low latency or BT.
- BT STANDBY MODE – pair your headset with a computer using the 2.4 GHz USB dongle and connect it to a smartphone using BT. With an incoming call, the set will automatically switch to the phone signal.
- Long working time – play sounds wirelessly for up to 60 hours on one charge at 50% volume. A full battery charge takes 3 hours.
- Convenient controls – the headphones have a roller and buttons to change modes, answer calls or adjust volume.
- Folded microphone – the built-in high-quality cardioid microphone provides clear communication. Fold it to mute it instantly.
- High-class drivers – thanks to the top-notch 50 mm drivers you'll hear every detail while playing, talking, and listening to music & podcasts.
- Hybrid memory foam pads – the combination of PU leather on the sides, soft fabric on the inside, and a memory foam filling provides comfort and sound isolation.
- Broad compatibility – the headphones work with a PC (stationary, and laptops), smartphones & tablets using Windows, macOS, Android and iOS systems, as well as with Switch and PS5/PS4 consoles.
