

Product name: Krux Palum

Product code: KRXD008

Do you prefer a toned design to backlights and futuristic space shuttle looks? If yes, Krux Palum fits your taste just right. This elegant case with wooden elements and a carefully planned interior can accommodate a strong setup for a designer or an architect as well as a true gaming beast.

Elegance tweaked to 110%

Krux Palum proves that a PC case without RGB backlight and/or a flashy design doesn't have to look boring. It catches the eye with its wooden panel front straight away, but strays from recalling your grandparents' Norwegian wood, rather alluding to modern interior design. What's more, the side panel with tool-free mounting lets you overview your components on the go. Krux Palum is a great fit for an office, living room, or a gaming station.

Fan set included

The case comes with two preinstalled Krux 120 mm fans – one in the front and the other on the back side. This set, along with the case's perforations, doesn't let you complain about Krux Palum's airflow. However, if you ever want to expand your setup, the case can be suited with up to 10 fans.

No entry for dust

The front, top, and underside of the PSU slot of Krux Palum are supplied with dust filters that heavily limit the amount of residue on the components inside. If you notice the dust accumulate on the filters after a longer while, you can dismantle and clean them easily. With Krux Palum, dirt is a non-issue.

Space for your gear

Krux Palum can contain even high-performance PC components like full-size ATX motherboards, up to 4 hard drives, up to 10 fans, advanced water cooling systems, long GPUs, big PSUs, and all kinds of cooling units. All this with ergonomics in mind – there's enough space to comfortably install everything and route all the cables.

Modern port panel

The I/O panel in the front contains 2 USB-A ports, minijack 3.5" combo audio port (for headphones/speakers and mic) as well as the reset and power buttons. That's not all – the users of contemporary devices will be happy to also find a USB-C port here.

Krux Palum – main features:

- Elegant design with dark wooden panels in front
- Two Krux 120 mm fans included
- Airflow-optimized body with dust filters
- Spacious interior for numerous and sizeable components
