

**Nazwa produktu:** Krux Exo White  
**Kod produktu:** KRXD009

The skeptics say you can't have it all, but we like to go against that kind of thinking. Here's a white PC case that is see-through, adjustable, stable, and roomy. And that's only the beginning of the list of its advantages!

At square one you get a package of solutions that will help you create a PC setup that matches your character, gaming station, or – simply – practical preference. You can focus on arranging, rearranging, customizing, and using, with no worries about the outside layer of your PC – Krux Exo White takes care of that.

### **For the big fish**

Make your whole beautiful setup clearly visible, and still exceptionally safe. The front and the side of the case are made of tempered glass, fitting into the "aquarium" trend. Think how many incredible configurations you can showcase this way! Not to mention the view of the backlight which goes perfectly with the white PC case...

### **Full bling on the go**

Krux Exo White is preloaded with a set of components and accessories that will provide you with tons of fun while customizing. First of all, it comes with four preinstalled 120 mm ARGB fans. What's more, it is suited with a splitter that lets you control the backlight type of each module separately. To top this whole package off, you get an external button to change the backlight type without launching the control application. What else would you need to make it all look good?

### **Fit everything you need**

The capacity of this case will surprise you. The chassis itself is 235 mm wide. Thanks to the ergonomic layout of the railings, you can fit it with a GPU up to 405 mm long and a cooling unit up to 181 mm tall. If that's not enough, the top of the case can fit a cooler up to 360 mm wide, and, if you are a bit of a strategist, there are ten 120 mm fan slots waiting for you to fill.

### **Wires out of sight**

The Krux Exo White case has one feature that makes it stand out among other such products. Its design allows you to install a hidden-connector motherboard, in which all plugs – those for power cords or fans, among others – are moved to the back. It's an invitation to create a tidy, aesthetic setup that you will be happy to lay your eyes on.

### **Krux Exo White case - technical specifications:**
