

**Product name: Krux Corvus 120 ARGB**

**Product code: KRXE006**

The Krux Corvus 120 ARGB fan blends eye-catching style with solid performance. Its precise PWM control, 22 ARGB LEDs with an infinity-mirror effect, and quiet hydraulic bearing keep your system cool and looking fantastic. Thanks to the included controller, you can enjoy its illumination even without a compatible motherboard.

### **Hypnotic ARGB illumination**

The fan draws attention with ARGB lighting enhanced by an infinity-mirror effect. A total of 22 LEDs embedded in the frame create a mesmerizing sense of light and depth. When connected to a compatible motherboard or a 3-pin ARGB controller, you can customize any effect or color you like. With built-in male and female plugs, you can daisy-chain several Corvus fans or other ARGB devices in no time.

### **Efficient PC cooling**

The Corvus fan can spin up to 1600 RPM, delivering strong airflow for effective heat dissipation. This makes it a reliable cooling solution both for everyday builds and high-performance gaming rigs where components generate significantly more heat.

### **Precise PWM control**

Fan speed is regulated through PWM — the most accurate method of controlling cooling performance. This allows your system to adjust the Corvus fan's RPM based on load and temperature, scaling smoothly all the way up to 1600 RPM when needed.

### **High-quality hydraulic bearing**

Corvus fans use a hydraulic bearing that combines quiet operation with long-lasting durability. Its lubrication system minimizes friction between moving parts, allowing the rotor to spin smoothly and almost silently. Such a design significantly extends the fan's lifespan, ensuring your setup stays efficiently cooled for years to come.

### **Fewer vibrations = quieter operation**

Corvus fans are equipped with foam mounts that effectively absorb vibrations before they reach the case, which eliminates unwanted noise and resonance. Combined with the hydraulic bearing, it boosts overall acoustic comfort and keeps your PC quiet even under heavy load.

### **Classic blade design**

Corvus fans are available in a classic variant and a Reverse version with inverted blades. This allows for mounting the fans so that the ARGB lighting and infinity-mirror front are fully visible. The Corvus 120 ARGB is an ideal choice for most standard PC cases, while the Reverse version is perfect for cases where the fans are visible from the side near the front panel — spots where a traditional model would only show the back of the frame.

### **Krux Corvus 120 ARGB – main features:**

- ARGB with infinity-mirror effect

- High performance
- Precise PWM control
- High-quality hydraulic bearing
- Foam mounts for vibration damping

**Krux Corvus 120 ARGB – technical specifications:**

- Product code: KRXE006
- EAN: 5903018668567
- Product type: PC fan
- Fans frame color: black
- Fans blade color: translucent
- Fans dimensions: 120×120×25 mm
- Reversed blade design: no
- Fans bearings: hydraulic
- Fans speed: up to 1600 (±10%) RPM
- Control (speed): PWM
- Connector (fans): 4-pin (female, male)
- Voltage (fans): 12 V
- Control (LED): ARGB
- Number of LEDs: 22
- Connector (LED): 3-pin (female, male)
- Voltage (LED): 5 V
- Cable length: 500 mm
- Lifespan (MTBF): 50,000 h
- Warranty: 24 months

**Krux Corvus 120 ARGB – logistics data:**

- Retail box dimensions: 140×123×26 mm
- Weight (net): 156 g
- Weight (gross): 178 g
- Master carton dimensions: 440×295×270 mm
- Master carton weight (gross): 11.4 kg
- Product quantity in master carton: 60 pcs

**Set includes:**

- 1× Krux Corvus 120 ARGB fan
- 1× Set of mounting screws
- 1× Safety instructions
