

Product name: Krux Zyro 96%
Product code: KRXA004

Krux Zyro 96% is a versatile wireless membrane keyboard designed for comfortable work and everyday use. It combines the full functionality of a classic layout with a compact 96% key arrangement, taking up less space on your desk. The contrasting color design and practical features make it a great fit for both home and office use.

Full layout in a compact 96% form

Zyro 96% offers the full set of 100 keys found on classic keyboards, but in a more compact form. Thanks to its condensed layout, all sections—including the numpad—are preserved while reducing the overall width. It's a practical choice for users who need full functionality but want to save desk space or carry their keyboard more easily. The look is completed by a contrasting design with retro-style color accents.

Quiet and comfortable typing

The membrane design delivers soft, quiet keystrokes. Low actuation force ensures smooth typing and reduces fatigue, even during extended use. It's a great fit for office work and everyday tasks, where comfort and low noise matter.

Two wireless connectivity modes

Zyro lets you easily switch between two connection modes using a toggle on the right side of the keyboard. Choose between 2.4 GHz wireless via a USB-A dongle or Bluetooth. This makes it easy to connect to different devices and adapt to various use cases.

USB-C charging

The keyboard is powered by a built-in battery charged via USB-C, with a 1.5 m USB-C to USB-A cable included. A full charge takes around 2 hours, so you can quickly get back to work. You can also use the keyboard while charging for added convenience.

Multimedia shortcuts

Zyro features a set of predefined multimedia shortcuts accessible via the Fn key in combination with the function row. They allow you to control volume, mute audio, manage media playback, use browser functions, and quickly access "My Computer" on Windows systems.
